16. The Product practices receiving a plurality of images. For example, the Product provides for the importation of images from a mobile device having a camera. Certain aspects of this element are illustrated in the screenshots below, and/or the screenshots provided in connection with other elements discussed herein.

The app lists images under folders (Camera, Bluetooth, Instagram etc) so you know exactly where to find what you're looking for. From what I've seen so far, the app works pretty well with my **LG G Watch**, with images loading up instantaneously almost as if they were stored natively. This update also fixes some bugs and brings performance enhancements to the standalone version of the app.
